Spring & Summer Programme
(Terms 5 & 6)

Spring Splendour
Foundation Stage & Key Stage 1
Term 5

Spring has sprung. And where better to learn about this colourful season than the Arboretum? See the new growth as the plants re-awaken after their winter rest. Discuss the different parts of plants and create some natural artwork.
(Some visits during this period will coincide with the bluebell season.)

Explore the World!
Foundation Stage & Key Stage 1
Term 6

Join us for a tour of the world! As you hunt for Mr. Peacock’s home, discover trees from different continents, and use your senses to experience the variety of shapes, sizes, textures and colours in the Arboretum. Take home a postcard to record your travels.
A world of trees
Key Stage 2
Term 5

Why do we have so many different plants and trees at the Arboretum? Why do we have a mixture of native and introduced species? Why is it important that we look after them all? Come along to find out about some of the world's rarest trees which grow here at the Arboretum. Find out about our native trees that grow all around you, learn to identify them and discover why they are important to us too. (This programme coincides with Plant Conservation Day and International Day for Biological Diversity.)

Habitats
Key Stage 2
Term 6

What is a habitat? What does an animal need in its habitat? Why do habitats need protecting? Explore the Arboretum's woods, meadow and pond, and play interactive games to learn about some of the animals and plants that live and grow here.

Each session runs for 2 hours and has a maximum capacity of 35 children. The cost of each workshop is £100. If you would like to stay at the Arboretum after your workshop for a self-guided visit, please let us know as we can advise on activities and seasonal highlights. You are welcome to stay for lunch; however we do not have any indoor space.
